Professional Objective

Motivated and ambitious software developer always aims to be more skilled and better team member.

Key qualifications

- Five years of experience in enterprise level applications and services mainly build with .Net framework.
- Have a solid understanding of algorithms and data structure, common design patterns, OOP, relational database.
- Agile mindset specifically familiar with scrum team.
- Experience with C# , SQL , Python , JavaScript,C/C++
- Worked with SQLServer and MySQL.
- Familiar with GIT, TFS..
- Open to work with new or different tech stacks.

Experience

- **Senior .Net developer at (Andalusia Business Healthcare solutions)**

  With such an agile environment implementing scrum process strictly, we have achieved to launch DOTCare which is a complete ERP system for large health care providers. It is up and running app, currently operating in five business units in Egypt and KSA.

  This system's architecture is SOA where each module has its own API working independently as SPA. Module Communicating via REST API and Message queue (Rabbit MQ)

  Finance Module: this module is a full accounting system on its own, documenting and managing financial transactions like invoices, claims and memo notes reflecting these documents into journal entries (book keeping accounting), it also generates standard financial reports like Trial balance. This Module built with ASP.net CORE ,EF and Vue.js as client side.

- **.NET developer at iFlow (11-2016: 12-2019).**

  Mainly worked on enterprise-desktop and server applications/services that is data intensive in nature with heavy transactions which require maintaining a reliable data access layer.

  Applications including:

  Stock management system: handle more than database that supports client's company branches with its warehouses and stores, generates reports and syncing data with e commerce API system.

  POS system: a reliable, user-friendly POS that works smoothly and synchronously with the rest of system's services. This solution build with c# and WPF as user interface.

  ERPNEXT: contributed to open-source project ERPNext to customize and extend its modules to meet special business needs. This solution is written in python.

  Crawler: web crawler project that gather data from competitors' online shops' apis and websites and generate required reports on timely basis. This solution build with c# and WPF as user interface

Education

2017-2021: pre-master diploma in Computer Science, Arab Academy for Science & Technology & Maritime Transport.

2009-2013: Bachelor of Accounting, Faculty of Commerce, Alexandria University.
